

Adding Imagination to Your Holidays

IMAGE PROJECTION SYSTEM (IPS) POLE MOUNT BRACKET

These instructions are for units shipped with an IPS Pole Mount Bracket in order to mount IPS units from a light pole, column, post, etc.

Install the IPS Pole Mount Bracket with the enclosed three adjustable bands. Secure adjustable bands as snug as possible to prevent any movement of bracketing.

At this point, please refer to the IPS Instruction sheets, beginning at 1A; inserting the Rain Shield Post into Rain Shield "C" clamp and attaching "C" clamp firmly to black pole shown here.
